

Portrait Session Guide

DISPLAYING YOUR ART

DECIDING HOW YOUR FINAL PORTRAITS WILL BE SHARED.

YOUR SESSION

SELECTING OUTFITS, POSING, AND HAVING FUN!

WHAT TO EXPECT

COLLABORATING TO TURN YOUR CONCEPT INTO ART

What to Expect

Portrait photography is our specialty. We invest in high quality equipment and continually network with other leading photographers to bring new techniques and session concepts to life.

Booking

A member of our Taylor Art Photos (TAP) team will speak to you at booking. Bookings can be made online or via phone. We recommend booking at least a month in advance, so that you have time to shop and prepare.

During our phone call, we will plan your session theme and location. Popular session concepts include fine art portraits, physique, film noir and pin-up.

Choosing Outfits

We will discuss outfit ideas, but definitely start thinking of clothing, footwear, accessories, makeup, poses, or props you would like to see in your session. Pull clothes from your closet and go shopping for any special items.

Share your ideas with the TAP team via text or email. Keep in mind, an hour session allows for two to three outfit changes, but bring extra ideas to the shoot.

*"You don't take a
photography -
you make it."*

Ansel Adams

Day of Your Session

Some clients choose to have their hair and make-up done by a make-up artist prior to the shoot. You can also meet your stylist at our shoot location. Just plan accordingly so that the shoot can begin on time.

Have your outfits and accessories together on hangers. This allows us to go through them in an organized fashion and prevents pieces from being left behind at home.

We will work with you to choose the best outfits and the order you will wear them throughout the shoot.

Posing

During the shoot we will guide you through posing. Some people are "naturals" and others need more guidance. Don't worry if you don't know what to do, it's our job to help you look your best and tell your story through pictures. Just relax and be prepared to have fun!

After Your Session

Approximately one week after your photo shoot, we will present you with your digital image package. If you ordered a print package, you will select your favorites to be professionally delivered as canvases, framed prints, albums, or acrylic art pieces.

About three weeks after your selection, your custom products will be delivered.

01 Portraits are Stories without Words

Portrait photography creates a story for people to see.

02 Everyone has a story to tell

Everyone has a unique quality that we set out to capture through lighting, processing and posing. We look forward to sharing in your visual story telling.

03 Every person should own one custom fine art portrait

so many people plaster their walls with generic works of art. We feel your story is the most important and can be handed down for generations to come.
